

APPLICATION SHEET

# Portable Flowmeters

Drinking water / Waste water

## Drinking water

- Estimation of leak flow rates
- Control of pump flow rates
- Control of in-line flow meters

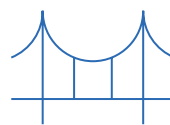

## Raw and waste water

- Control of lift pump flow rates
- Control of in-line flow meters
- Control of discharges into the natural environment

## Hydraulic expertise

- Diagnosis of installations
- Assessment of issues

## Civil engineering

- Validation of compliance upon acceptance of works
- Optional temperature measurement for calculating thermal power (HVAC)

# Flowmeters

## Minisonic II P

- Analogue signal processing suitable for standard applications
- 1 measurement channel
- Internal recorder
- Measurement echo display
- Autonomy management

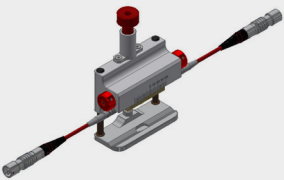

## Uf-801 P

- Digital signal processing suitable for demanding applications
- Up to 2 measurement channels
- Internal recorder
- Measurement echo display
- Autonomy management
- Calorimetry - optional

## External transducers / Clamp-On Magnetic or strap attachment

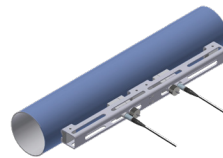

Kit SE 1791

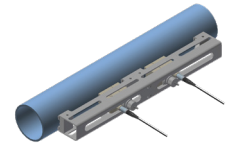

KIT-SE1790

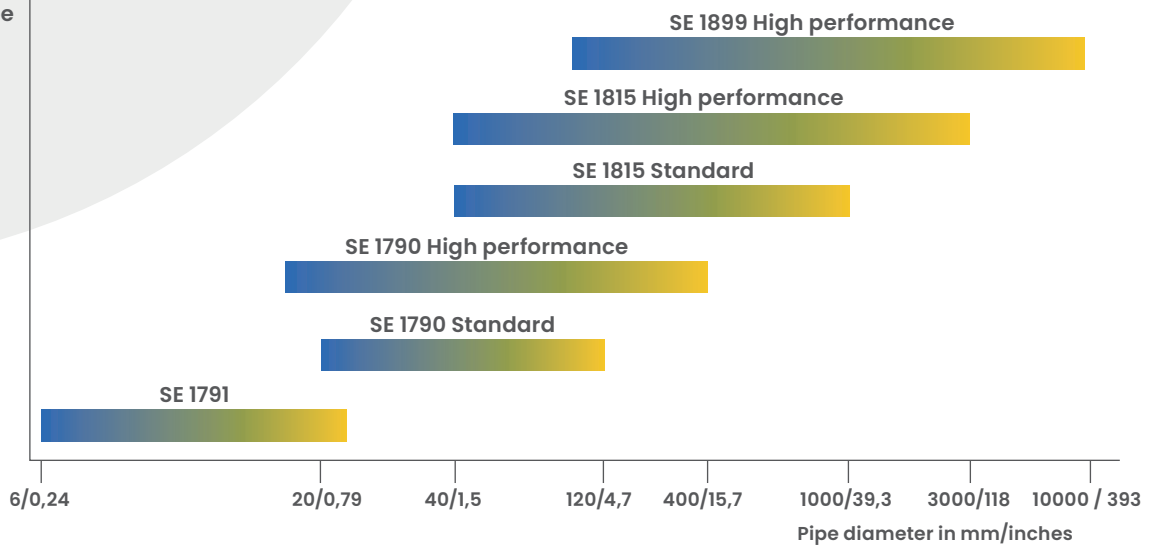

KIT-SE1815

KIT-SE1899

Type

## Services - Engineering

### On-site services

- Comparative measurements
- Online device sizing assistance (pumps)
- Training in handling
- Periodic preventive maintenance visits
- On-site technical assistance (after-sales service)

### Temporary measures

- Portable flowmeters rental
